

# Elite 3D

## 3D Scanning & Engineering

**Elite 3D** is a division of Elite Seal and is proud to offer engineering and inspection utilizing the Creaform HandySCAN 3D™ Black Elite. The Creaform Black Elite is the leader in portable metrology grade 3D scanners. Optimized to meet the needs of design, manufacturing, and metrology professionals, the BLACK Series provides the most effective and reliable way to acquire accurate 3D measurements of physical objects anywhere.

This fast and versatile patented handheld 3D scanner is easy to use and generates highly accurate and repeatable results—even in difficult environments and with complex surfaces. The scanner is ISO 17025 certified and our company is ISO 9001:2015 certified.

Our group can scan complex materials and shapes with our 3D scanner to provide clients with inspection services and reverse engineering services. We are able to generate a 3D model and import the model to CAD with unparalleled accuracy in lightning-fast time. Save time and money by utilizing our team and tools to ensure consistency with manufactured components.

- ◆ 3D Scanning Services
- ◆ Reverse Engineering Services
- ◆ Full CAD/STL
- ◆ Inspection Reports
- ◆ Metrology Services (Part Inspection)
- ◆ On-Site 3D Scanning Services (Upon Request)

Certified Accuracy of 0.012mm

ISO 17025

Large Scanning Area

Patented Next-Gen Technology

High-Speed 3D Data Acquisition
